FAIR PLAY!

JOHN HYDER

It is too bad but—occasionally we find a merchant who tries to make the public believe that his house is the only reliable one in the city and that his line of merchandise is the best, that all others are inferior in quality. Now there is no doubt but that there is high quality merchandise and low quality merchandise and it also follows that some merchants are more reliable than others. But there are numerous high grade "makers" and also lots of low grade "makers." High grade goods are very high grade goods and it would be folly for me to try to make the public believe that they were the only high grade line on the market. One store carries one brand and another store some other kind; some people favor this make and others favor that, etc. Because I smoke one brand of 25c cigars it does not necessarily make that particular line of cigars better than the 25c line smoked by some other merchant. Everybody has his own taste.

Competition is what makes the business world go 'round but, as there are different qualities of merchandise, and different classes of merchants, some reliable and others not so reliable, so—there are different manners of conducting competition. We all invite legitimate competition. We like it—it is fine and necessary to the best interests of the business world. But when competitors use unfair means, when they employ eleventh-hour work, when their goods are not marked fairly, when they are not truthful in their advertising, when they mislead the public by clever advertising schemes, when their cards are not on the table—then we merchants who ARE conducting legitimate businesses have a right to make a noise. We want fair play and we appeal to the intelligent public to place their confidence in the concern that plays fair and spend their money at their best judgment dictates.

Sometimes it might appear that I am a trifle personal in my insinuations and remarks but I can always substantiate my statements and stand ready to back up what I say.

I feel that it is my duty to warn my friends and customers now and then, to give them what information I have at hand. I feel that my frank statements are appreciated and I will continue to play fair and give my customers the very best for the lowest possible price.

I carry quality merchandise and my prices are down in bedrock. I have values that are almost unbelievable and I invite your inspection. Remember—I believe in the live and let live policy and you are always assured of courteous treatment to my store.

JOHN HYDER.
